

The Quest Solution for Field Productivity

with **VIA** Order Entry

VITAL INFORMATION ANYWHERE™

Empower Your Workforce

Increase productivity in the field with VIA Order Entry.

Remote workers demand rapid access to information and up to date data to facilitate and streamline their job functions in the field.

VIA Order Entry running on a portable device can end the “blind order” aspect of current systems by providing the much needed information to the mobile worker. The quality of information exchanged between your field associates and corporate office determines the efficiency of your process. **VIA Order Entry** dramatically increases the speed and accuracy of sales orders and field gathered information. **VIA Order Entry** allows two-way communication to your field personnel – as sales orders are sent in, customer and pricing information is updated on the handheld device. Eliminate the time-consuming and error-prone process of faxing or phoning in orders with legacy equipment. And speaking of legacy equipment, we can migrate most users of acoustic devices into these new devices using our proven communication products such as **WTMip**.

WTMip Mobile Software Platform

Utilizing **WTMip**, hand held and portable devices can communicate from anywhere: home, wireless “hotspot” or the office.

Features and Benefits
