

# The Quest Solution for Test, Pilot and Implement RFID

with **VIA** RFID NOW!

VITAL INFORMATION ANYWHERE™

RFID is making a tremendous impact in the way companies are tracking products, containers and documents.

Now your company can implement an effective RFID program without the cost and complexity of middle-ware software products. **VIA RFID NOW!** facilitates reading multiple RFID tags per container/pallet and integrating that information into existing ERP or legacy systems.

**VIA RFID NOW!** is compatible with most major RFID readers and will interface RFID data into existing applications through a USB or network serial interface. It can launch a particular application or window to direct where the results of the RFID data should go. A flexible configuration file allows for individual timing parameters to be adjusted adapting to the particular environment. Additionally, a tag commissioner program is included to write data to blank tags. This eliminates the need for an RFID printer if you are reusing tags or have a small amount of

***Interfaces to numerous RFID Readers.***

## Experience the Benefits

- Eliminate the need for expensive middleware, consulting, or reprogramming
- Experience the advantages of RFID earlier than competitors
- Read RFID labels, commission RFID tags, read multiple tags and schemas
- Eliminate need for RFID printer by using tag commissioning feature
- Direct or re-direct RFID data to trading partners, or other applications
- Simple configuration menu driven operation
