Global Asset Management for Enterprises

Comprehensive Solution for the Management of Physical Assets

TrackX's GAME (Global Asset Management for Enterprises) platform is a turnkey asset tracking and management solution software that utilizes data from real-time tracking technology such as RFID, GPS, BLE (Bluetooth Low Energy), and other auto ID technology as well as other devices such as cameras, sensors, actuators, etc. to produce meaningful intelligence for the optimization of business processes. The platform provides real-time visibility and control of all high-value and/or mission critical assets to help increase asset and labor optimization, decrease shrinkage, and adhere to regulatory compliance in many different industries.

A Universal Solution for All Requirements

GAME was designed to be flexible and configurable with numerous technology modules to deliver a comprehensive solution built on a single platform. Not only does this give our solutions the ability to be configured differently based on workflows and use cases, it also enables an enterprise to utilize the platform for several types of assets, projects, divisions, etc. TrackX provides tracking and management solutions for a variety of industries.

DEVICE MANAGEMENT

WORK FLOW PROCESSING

ENTERPRISE INTEGRATION

ANALYTICS/REPORTING

MOBILE DEPLOYMENT

TrackX Edge - enables configuration and infrastructure management of all active IoT devices

TrackX IQ - optimizes business processes, schedules user tasks & provides alerts

TrackX Connect - allows integration with or provides real-time information to other systems

TrackX Insight - delivers detailed reporting, business intelligence, & advanced analytics

TrackX Mobile - engages in field workforce with valuable real-time information on assets

Whether you're doing in-the-field tracking, performing regular asset inventories, or simply need a means to manage assets without an extensive fixed tracking infrastructure, TrackX's mobile solution, TrackX Mobile, provides a way to track assets anytime, anywhere. The solution gives users the flexibility to connect to a wireless network, or run in batch mode; this compliments GAME by providing search functions, inventory management capabilities, record updates, and other features that allow users to have access to asset visibility and management from any smartphone device.

Configurable Solution

Configure fields, attributes, locations and more to match the specific information you need to manage.

Integrate into any existing business system to pass valuable information to and from the GAME platform and get even more value out of your solution.

Deploy the right technology today, and plan for the technology of the future - TrackX works to deploy the right technology to fit your budget and use case with a vision to support future technologies

Customize the implementation support needed. No IT personnel available; no problem. Facilities people busy; fine with us. We'll streamline your implementation to be as hands-on/off as needed.

Configure workflows, alerts, reports, etc. so that the right people have the right information at the right time.

Attach asset records as needed, whether tracking a container and its contents or two parts of a whole, etc.

One Platform for all Assets

IT/ Electronics - manages asset inventory, owner, location, lifecycle, audit compliance, subscriptions

Returnable Transport Items - optimizes usage based on numerous real-time inputs such as location, inventory, cycle times, contents, age, condition

In-Transit Equipment & Assets - manages assets in service vehicles as well as vehicles themselves, providing vehicle inventory, location, route stops, delivery confirmation & optimization

Manufacturing Assets - tracks valuable equipment's location, status, maintenance/repair records, workflows for optimized usage

for **SCM**

TrackX's GAME for SCM (Supply Chain Management) provides insights into business processes in real-time. Optimizing logistics operations & freeing up resources to focus on growing your business.

for **RTI**

Take control of unnecessary capital expenditures. TrackX's GAME for RTI (Returnable Transport Items) optimizes the usage of your asset fleet. Increase your revenues without unnecessary capital injection.

for **EAM**

TrackX's GAME for EAM (Enterprise Asset Management) decreases labor, optimizes asset usage, decreases loss & manages audit compliance while freeing up resources to focus on growing your business.
